

Apollo Scientific Ltd Environmental Policy Statement

Apollo Scientific Ltd is an environmentally conscious organisation and as such we acknowledge the potential environmental impact that our chemical storage, production and R&D operations may have on the environment.

This policy has been endorsed by Senior Management who give their full support to its implementation. The Senior Management in co-ordination with the 'environmental champion' are responsible for ensuring that it is communicated, understood, implemented and maintained at all levels within the organisation.

We are committed to the prevention of pollution and continual improvement of our environmental performance. This has been facilitated through the setting of environmental objectives based on our significant environment aspects. These objectives will be documented, allocated targets and periodically monitored and reviewed through 'audit programmes'. The results of which are communicated throughout the organisation and to our clients, suppliers and contractors as appropriate.

As an organisation, we are committed to ensuring that we: -

- Comply with all environmental legislation, using codes of practice and guidance produced by regulatory bodies to assist where appropriate.
- Provide all employees with the necessary resources, equipment, information, instruction and training to fulfil the requirements of this policy, commensurate with their role.
- Work towards the implementation of an environmental management system in accordance with the requirements of BS EN ISO 14001: 2015 and in accordance with other health and safety and quality procedures.
- Strive to integrate environmental best practice into our business operations.
- Prevent pollution to the environment by ensuring that we manage transport operations.
- Minimise waste to landfill by reducing our waste generation and by segregating and recycling waste where economically and operationally feasible.
- Co-ordinate business mileage so as to reduce fuel usage.
- Use energy, water, materials and other natural resources as efficiently as possible, giving particular regard to the long term sustainability of consumable items.
- Work towards the identification, quantification and reduction of our carbon footprint.
- Ensure that the environment is considered in the procurement of goods and services.
- Give appropriate consideration for the environment in the goods we provide to customers.

This policy will be communicated to all employees and organisations (Suppliers and Sub Contractors) working for or on behalf of Apollo Scientific Ltd where necessary. Employees (and other organisations) are expected to co-operate and assist in the implementation of this policy, whilst ensuring that their own work, so far as is reasonably practicable, is carried out without risk to themselves, others, or the environment.

This policy will be periodically reviewed by Senior Management and where deemed necessary will be amended and re-issued.

This policy statement is displayed on-site and is publicly available through our website, reception areas or as may be reasonably requested by any interested party.

Signed:

CEO on behalf of *Apollo Scientific Ltd*
